Agile Delivery Manager

Agile Delivery Manager with 25+ years in technology and transformation. Delivered Agile maturity uplift across eight engineering functions, coached 30+ teams, and implemented SAP S/4HANA for Jaguar Land Rover. Known for rescuing failing projects and restoring delivery capability in under six months. Certified Scrum Master and Scaled Agile Coach who bridges product, engineering and operations to deliver measurable outcomes in fast-changing, complex environments.

SKILLS

- Agile Delivery Leadership (Scrum, SAFe, Kanban) - certified expertise in leading ceremonies, coaching teams and scaling Agile practices.
- Programme & Portfolio Management - balancing multiple projects, aligning roadmaps and juggling competing priorities.
- Cross Functional Team & Stakeholder Management - engaging product, engineering and operations stakeholders & fostering collaboration and communication
- Metrics & Reporting Governance - using tools like Jira and Confluence to track velocity, quality and delivery status, ensuring data driven decisions
- Scaled Agile Coaching & Transformation - leading enterprise Agile adoption and governance to ensure consistent practices across teams.

EXPERIENCE

DOMAIN SCRUM MASTER / AGILE COACH

November 2023 - Present

Jaguar Land Rover, Gaydon

- Led Agile uplift across 8 engineering functions (NVH, Durability, Human Factors), increasing sprint adoption by >20% in six months and increased throughput on existing teams
- Spearhead an Agile maturity uplift to align work streams with customer outcomes identifying >20% duplication
- Manage and prioritise multiple initiatives, coaching eight group Scrum Masters and 30 + teams, and coordinating roadmaps across product, engineering and operations
- Collaborated with engineering leads, product owners and operations to break down silos, build collaborative teams and ensure consistent delivery
- Implemented data driven dashboards in Jira and Confluence to track velocity, quality and impediments, ensuring transparent reporting and decision making
- Established governance frameworks and scaled Agile ceremonies to improve stakeholder alignment

AGILE DELIVERY LEAD

April 2023 - November 2023

Tata Technologies / Bambrook Ltd, Leamington Spa

- Drove Agile adoption across JLR's SAP S/4HANA programme, embedding Scrum/SAFe practices that improved delivery cadence by 25%
- Implemented transparent metrics via Jira/Confluence, creating consistent executive-level reporting

- Coached cross functional teams and leadership to sustain Agile practices; delivery improvements led to a permanent role at JLR
- Secured follow-on engagement at JLR due to measurable delivery improvement

INTERIM AGILE DELIVERY MANAGER

June 2022 - April 2023

BJSS, Birmingham/London

- Directed to rescue an Azure based data engineering team within a SAFe programme & diagnosed root causes, established better backlog management and coached the team to adopt good Agile practices
- Re-engineered Azure data engineering team within SAFe framework; restored full delivery capability in <6 months
- Managed key deliverables for national Market-Wide Half-Hourly Settlement programme
- Tracked velocity and quality to restore full delivery capability within six months & instituted data-driven retrospectives and continuous improvement practices
- Introduced backlog discipline and continuous improvement loops that improved on-time delivery by 30%

PORTFOLIO MANAGER / AGILE COACH

October 2021 - June 2022

Capgemini, London

- Oversaw a portfolio of transformation programmes across financial services, balancing multiple projects and competing priorities by drawing on strong organisational skills
- Provided Agile leadership and coaching to cross functional product and engineering teams, establishing a shared vision and fostering an environment where teams could thrive; decisions were data-driven
- Aligned product owners and stakeholders to prioritise backlogs and align roadmaps with strategic goals ensuring clear communication and effective conflict resolution resulting in project alignment
- Negotiated with clients and vendors to secure resources and manage scope, demonstrating diplomacy and stakeholder management skills
- Implemented risk management and governance structures, using risk adjusted backlogs and other agile tools to identify and mitigate risks, ensuring resilient delivery

SENIOR CONSULTANT / AGILE DELIVERY LEAD

May 2021 - October 2021

North Highland, Gaydon

Delivered digital transformation projects for major banking clients, launching the UK's first cloud based bank and rolling out Temenos based platforms.

- Led cross functional teams across product, engineering and operations, building collaborative cultures and aligning diverse stakeholders
- Facilitated agile ceremonies and mentored teams, ensuring clear communication of project vision and technical specifics to stakeholders
- Balanced multiple workstreams and dependencies while maintaining budgets and schedules, leveraging organisational skills to juggle competing priorities
- Practised servant leadership and data-driven decision making, empowering teams to self-organise and deliver outcomes

AGILE DELIVERY LEAD

May 2013 - May 2021

Capgemini, Manchester/Dublin

- Led early digital transformation programmes, coordinating cross functional teams and balancing multiple workstreams across banking clients
- Pivotal to the delivery of the first UK bank in the Cloud running in Amazon Web Services (AWS)
- Introduced Agile practices and coached teams through complex migrations and integrations, promoting a culture of continuous learning and servant leadership, delivering on timelines
- Collaborated with stakeholders to align programme goals with business strategy and ensured clear communication of objectives

- Managed risks proactively, using agile techniques such as risk adjusted backlogs to prioritise tasks based on risk and customer value improving time-to-market

EARLY CAREER (PRIOR ROLES)

January 2013 - December 2013

Capgemini, Various

- Built a strong technical foundation across engineering and software development, working with languages such as Java and Python and databases such as Oracle
- Led teams and projects across sectors, honing collaborative leadership and communication to align diverse stakeholders and ensure clarity, creating better co-ordination
- Transitioned into project management roles, applying organisational skills to manage concurrent initiatives and juggle competing priorities
- Negotiated with vendors and partners to secure resources and manage scope, developing diplomacy and stakeholder management capabilities
- Practised risk management and continuous improvement, using agile methods and data driven insights to mitigate issues and improve outcomes

EDUCATION

Professional Development, Sheffield Halam University

Certified Scrum Master | Certified Scrum Product Owner | Harvard Business School Leader | Learning Development Network (JLR) - Agile Coach
